

Event programme

Nobody knows more about REACH.

REACH and CLP – the Basics

22 February 2012 – Hallmark Hotel Derby, Derby, DE1 2SQ

Who should attend?

Business and regulatory managers and specialists working in companies that make, import or use chemicals (essentially every manufacturing or construction business within or supplying to the EU) who are beginning to define their obligations under REACH and the CLP regulation.

This workshop is an excellent place to start for anyone who needs to understand more about their compliance obligations under these regulations.

Book before 20 January for an “early bird” discount.

Why attend?

REACHReady is running this one-day workshop to help companies with the practical implementation of these regulations. The comprehensive programme provides an introduction to the key elements of REACH and CLP and includes talks covering the implications for manufacturers, importers and users of chemicals throughout the supply chain.

The REACH (Registration, Evaluation, Authorisation and restriction of CHEMicals) Regulation is fundamentally changing the shape of every supply chain within the EU. REACH affects all chemical substances that you **manufacture, import** or **use** to make your products and to run your processes.

Whether you need to register substances under REACH or not, EU Safety Data Sheets are changing. So in the afternoon we will give an outline of the changes to this aspect of communicating hazard and risk management information within the supply chain.

And as if that’s not enough, if you need to know more about REACH then the chances are that you will also be affected by the new EU Regulation on Classification, Labelling and Packaging of substances and mixtures (CLP). So we will close the day by providing attendees with an overview of what this could mean for your business.

Outline Programme

09:30	Coffee & Registration
10:00	Welcome Introduction to the REACH regulation
	What’s covered by REACH Scope of the regulation, exemptions and exceptions, what needs to be registered
	Coffee
	Overview of the Registration process Who needs to register, what’s in a registration dossier, Lead and member registrants, basic data requirements
	The Candidate List and SVHCs Authorisation process, “problem” substances
12:45	Lunch
13:30	What’s new with EU Safety Data Sheets Supply obligations, updates to REACH Annex II, periods of grace for existing SDS
	Format and content of the SDS Layout of the SDS, the extended SDS, headings and subheadings
	Introduction to the new CLP regulation The link to GHS, key requirements of CLP, how hazard communication is changing from the old legislation
	CLP notification Notifying classification and labelling of substances to ECHA, online submission in REACH-IT
	Q & A
16:30	Close
