

Event programme

SDS awareness – SDS for mixtures

13 March 2012 – Leeds Novotel, Leeds, LS1 4HR

Who should attend?

Everyone supplying **mixtures** in the EU, from importers to formulators, needs to understand the safety data sheet and how REACH affects it. This day will be of particular interest to those who are responsible for preparing safety data sheets (SDS) for the mixtures they formulate and supply to the end user and to other European downstream users.

You'll get the most from the day if you have some understanding of the SDS as well as knowledge of hazard communication under the Dangerous Preparations Directive (DPD). However, if you're not fully up to speed don't worry, you'll still really benefit from coming along! We will assume you are familiar with REACH and the CLP regulation.

Book before 10 February for an "early bird" discount.

Why attend?

Delegates attending this one-day workshop will find out more about the following key issues:

- ✓ Understand what the SDS for mixtures needs to contain, and why
- ✓ Appreciate the transitions from DPD to REACH and CLP
- ✓ Understand the principles behind writing a REACH-compliant SDS
- ✓ Learn about exposure scenarios and including relevant information for your customers' uses

To do this we will use a combination of teaching and practical demonstrations. We have an informal style so there will be plenty of opportunity to quiz our experts throughout the day.

Programme

9:00	Coffee and Registration
9.30	Introduction to the new SDS Changes to the SDS in a nutshell – why change, what is changing, how to do it, and when.
	From the SDS Directive to REACH & CLP Changes to REACH Annex II, future changes, timings, transitional arrangements
	Classifying mixtures under CLP Obligations, sources of information, translation from DPD, classifying from data, bridging principles
	Section-by-section review of the new SDS for mixtures The content and level of detail
13:00	Lunch
	Managing risk & communicating advice Relating REACH registration to real life, implications of your supplier's exposure scenarios for you and your customers
	Incorporating supplier ES into your SDS Extracting relevant information, tailoring the SDS to your customers' uses, avoiding information overload
	Computer-based solutions to SDS generation Creating SDS for mixtures
	Q & A
16:30	Close
